

**Wellington District Land Transfer Index 1874-1911**

Archives New Zealand Reference AEFT 19643 W299 LTOW299 179 Volume 2 – Folios 1 to 116  
 Previous and forward references to other index volumes take the form of volume number/folio number

For each person the register records one or more land transactions and for each transaction are recorded: Date, Nature of Instrument, No. of instrument, Land description, volume and folio. The last two columns may be Certificate of Title references?

For the following: Under the Previous column 'from folio' means that the folio number referred to is in this volume and reflects the practice of the clerks to backfill earlier empty pages. Further evidence of this can also be seen in the Forward to column where it indicates 'to folio'. When the residence and occupation of the person are not provided the place associated with the first land transaction is listed instead.
